MOT test.

Newsletter December 2011

Open Days

We recently held our annual open days at our Brailes Depot which were very successful. We had a really good turnout, and the weather held enabling us to have working demonstrations on both days of machines and Guidance Systems.

If you would like to discuss further what you saw on the day, or were unable to attend and would like more information please contact us.

We stock a range of GPS equipment, please see the next page for details.

Used Sprayers

We have a wide range of second hand sprayers available, and stock that is changing all the time - call us now with your requirements.

Guardian Air Spray Nozzles

We are stockists of Guardian Air Nozzles, which are scientifically designed finer Air-Inclusion nozzles proven to deliver improved performance in the field. They offer a balance of excellent target coverage with reduced spray drift that can be fine tuned by the user. Guardian AIR™ nozzles are suitable for a wide range of crop spraying applications and are available in seven sizes.

FEATURES & BENEFITS

- Better coverage with more drops per litre compared to other Air-Inclusion spray nozzles
- Up to 75% drift reduction ratings at lower pressures to enable more spraying days
- Good spray distribution at lower spraying pressures
- Spray incline calculated for each nozzle to allow uniform coverage on the front and back of the plant at a wide range of speeds
- Unique droplet structure produces droplets that stick to target
- Excellent results at lower water volumes for faster work rates. 100 l/ha often outperforms 200 l/ha flat fan sprays in field trials
